

Spellian teaches languages in the most natural way: by **listening** and **talking** to a native speaker

The benefits are immediate:

- Spellian students rapidly improve their confidence and motivation.
- They learn to talk like locals and develop a strong intercultural understanding.
- Regular practice with our focused program boosts exam results.
- Studying a language becomes fun, appealing and rewarding.

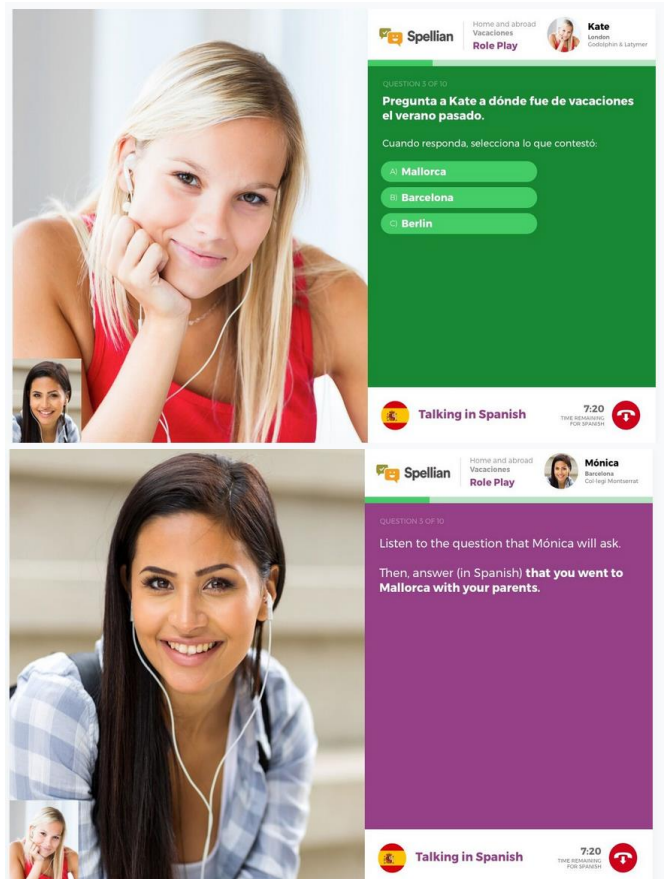

Spellian matches secondary schools in England, Spain, Italy, France and Germany, assigning a native buddy to each student involved in the program.

Spellian students meet once a week, from home, using real time video chats embedded with specific language resources.

New activities are proposed in each session to cover the different learning targets and keep the conversations lively and meaningful.

All Spellian resources are developed by specialist native language teachers and comply with the school's exam boards.

Additional dedicated teaching support is available on request, tailored to individual students' needs.
